*Making a Zine from a Sheet
of Paper (Folding)*

Gluing Zines Together

SUPPLIES:

1. *Cover page*
2. *2–3 pieces of paper*
3. *Glue*

STEP 1:

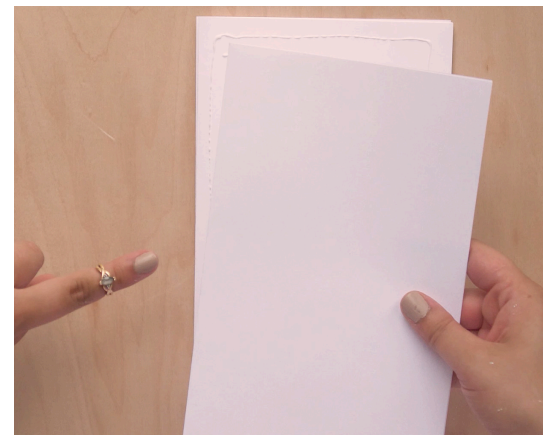

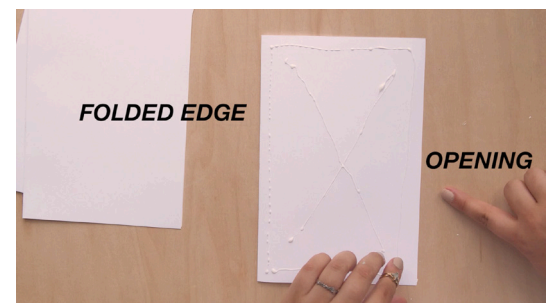

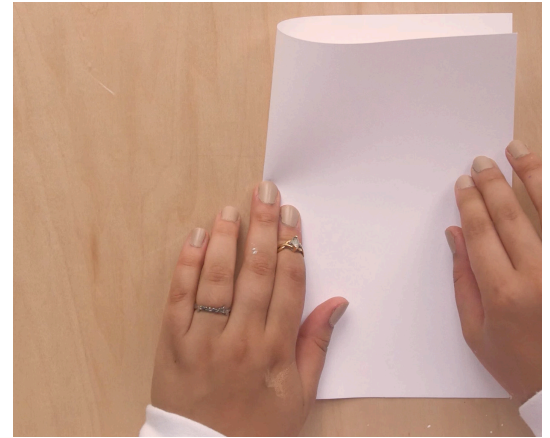

Fold pieces of paper in half, hamburger-style. These will become your inserts.

STEP 2:

With the folded edge to your left and opening on the right, put glue on one of your inserts.

STEP 3:

With the folded edge to your left and opening on the right, place another insert on top of the glue.

STEP 4:

Repeat steps 2–3 for however many pieces of paper you want in your zine.

STEP 5:

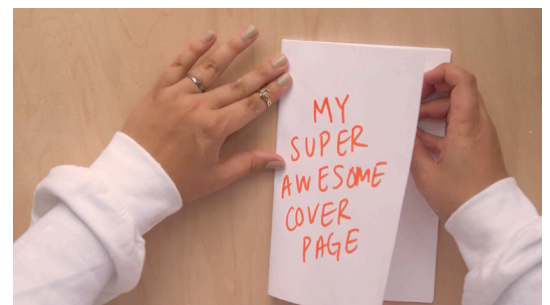

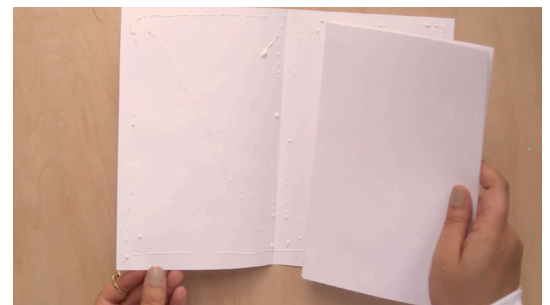

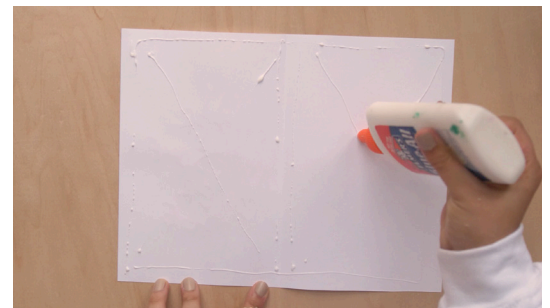

Place all the glued-together inserts to dry.

STEP 6:

Open your cover page so that the blank inside is face up.

STEP 7:

Put glue all over the page.

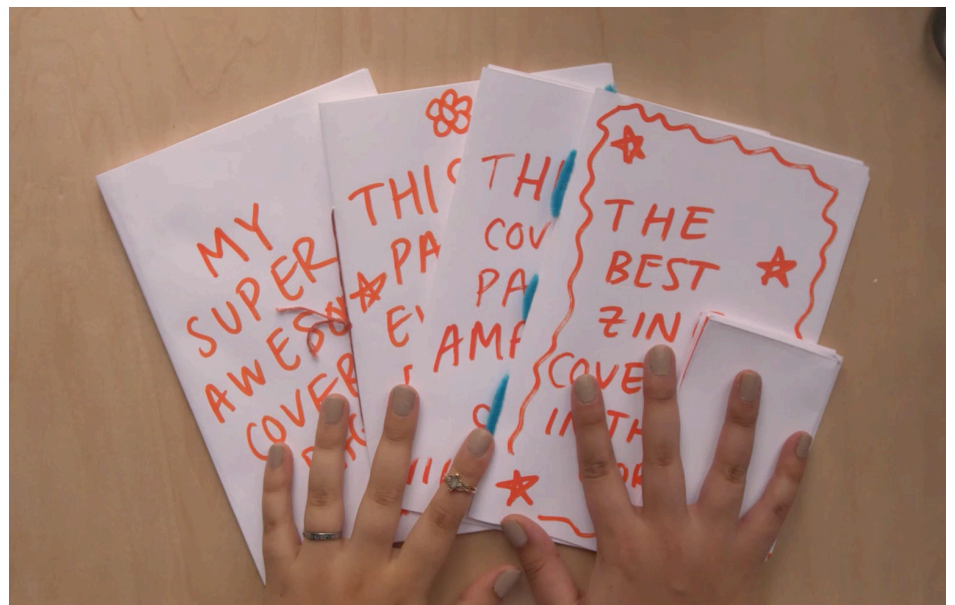

STEP 8:

With the folded edge of your inserts to the left and opening to the right, glue your inserts to the right half of your opened cover page.

STEP 9:

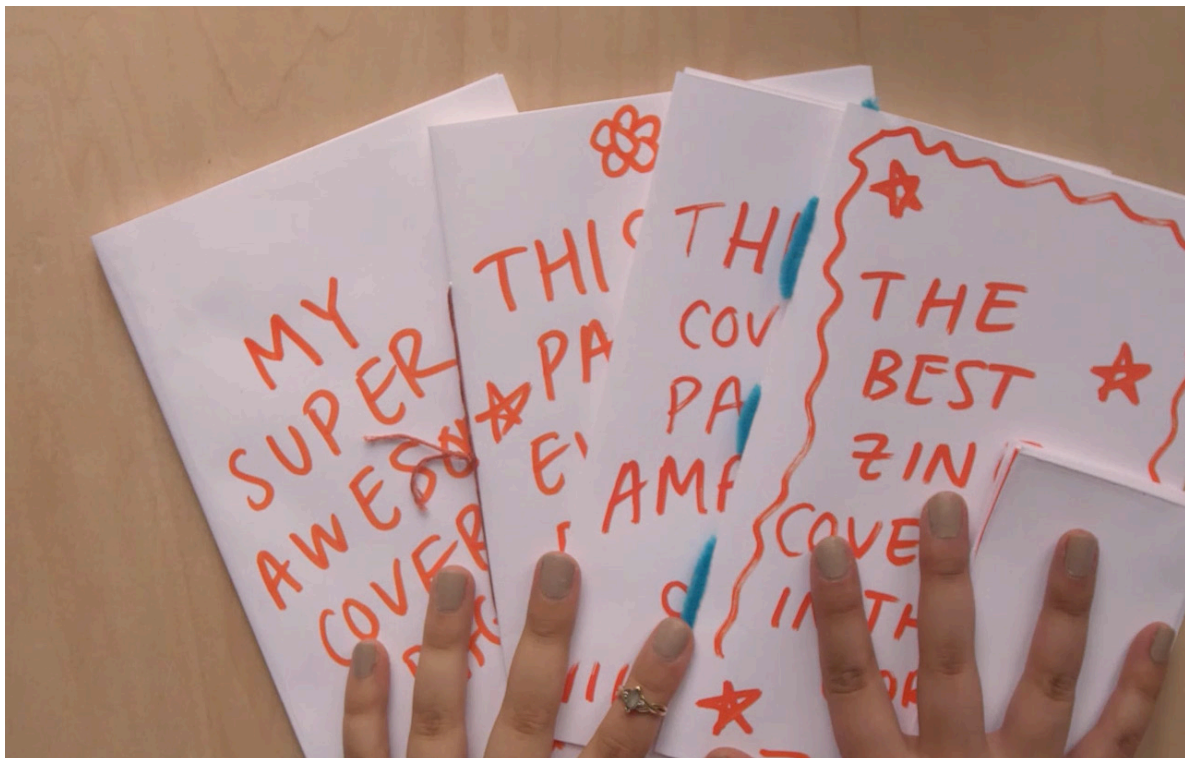

Next, press your cover page closed over the inserts, and press. Then set aside to dry.

Sewing Zines Together

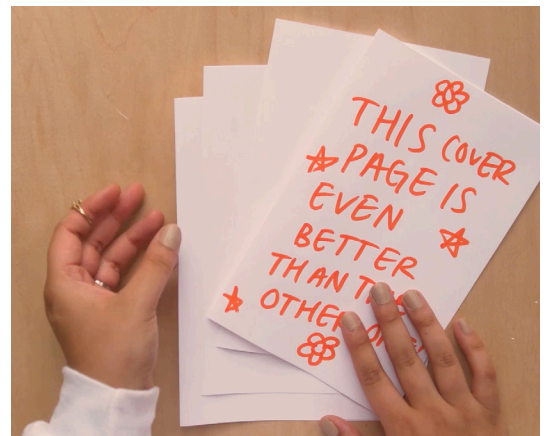

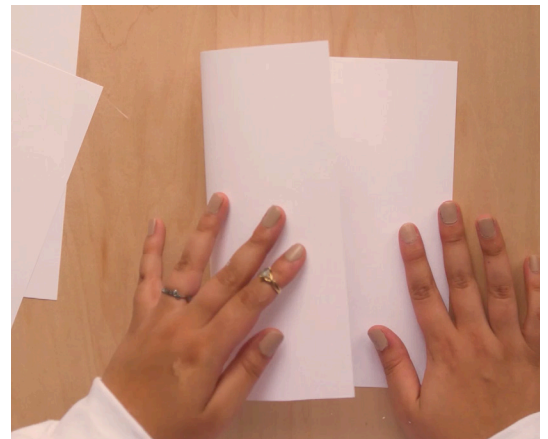

SUPPLIES:

1. *Cover page*
2. *2–3 pieces of paper*
3. *Needle*
4. *Thread/string*
5. *Scissors*

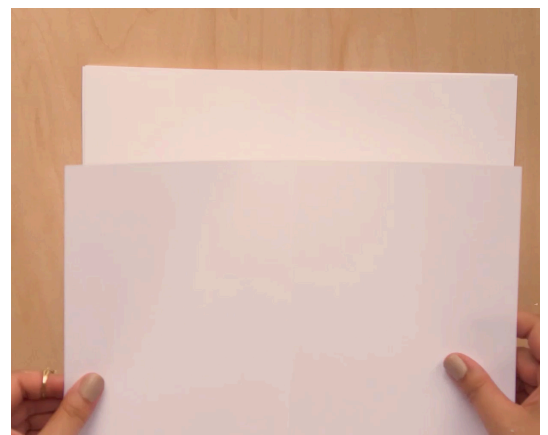

STEP 1:

Fold pieces of paper in half, hamburger-style. These will become your inserts.

STEP 2:

Once all of your inserts are folded, align the middle of your papers and stack them on top of each other.

STEP 3:

Wrap the cover around the outside.

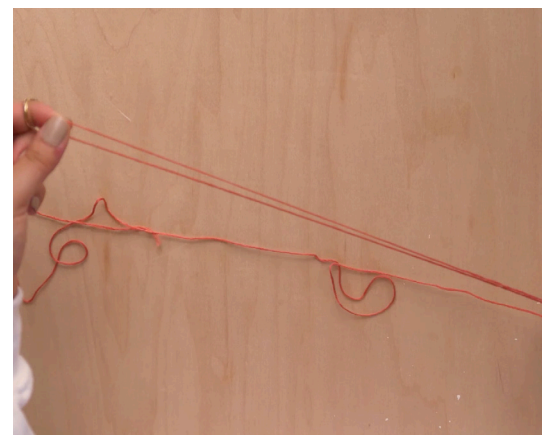

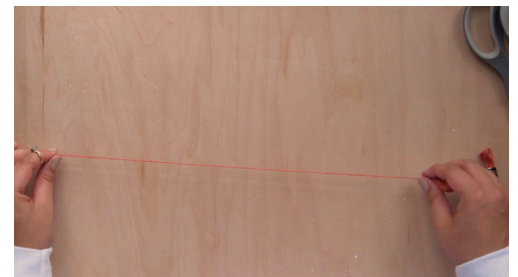

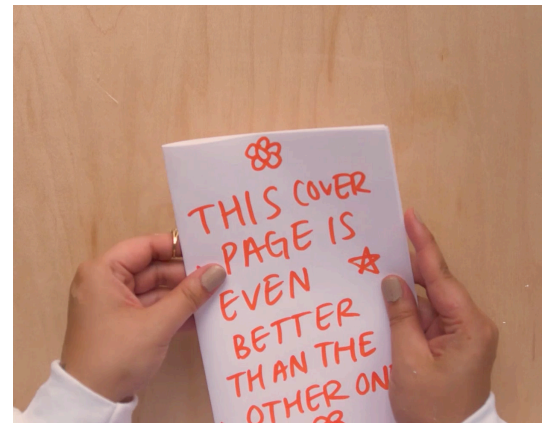

STEP 4:

Take your thread and pull out to twice the length of your arm, or about 2 feet.

STEP 5:

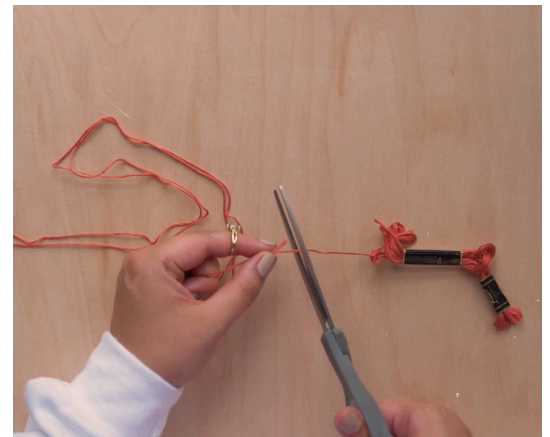

Once you've pulled it to the proper length, double it up so that it is twice that length, about 4 feet.

(It's better to have a thread that is too long than too short.)

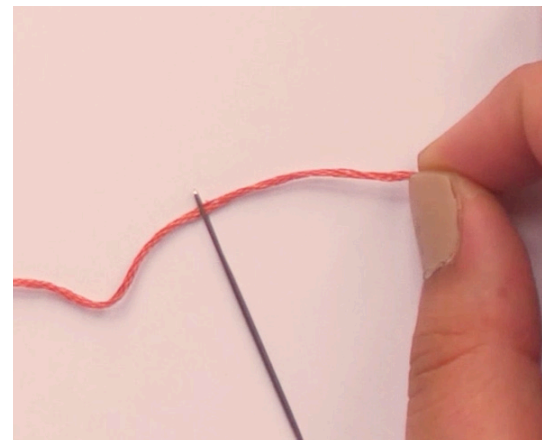

STEP 6:

Using your scissors, cut the thread.

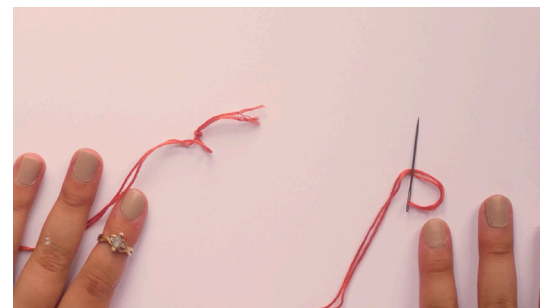

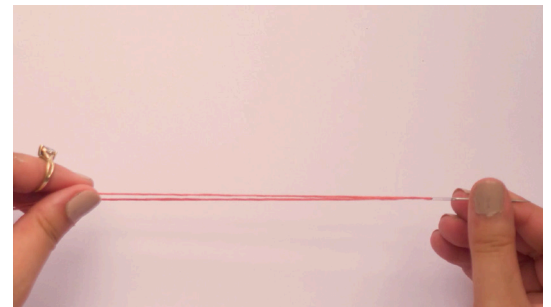

STEP 7:

Thread the needle by putting one end of your thread through the hole at the end of the needle.

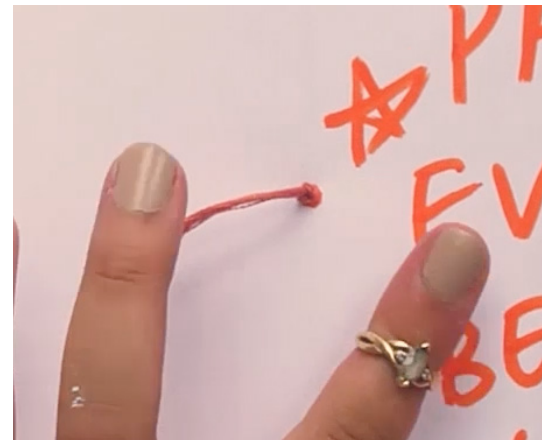

STEP 8:

Pull your thread so that the needle is in the middle of your thread. Match up the ends of your thread and tie a knot.

STEP 9:

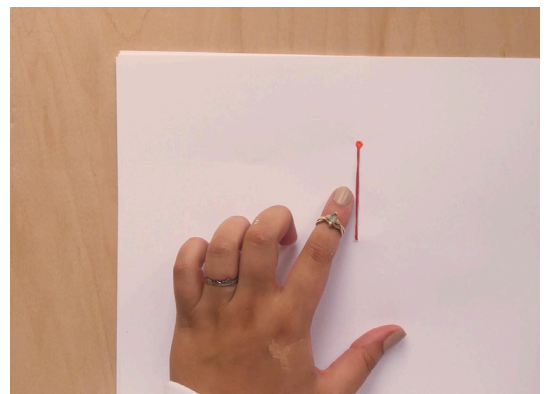

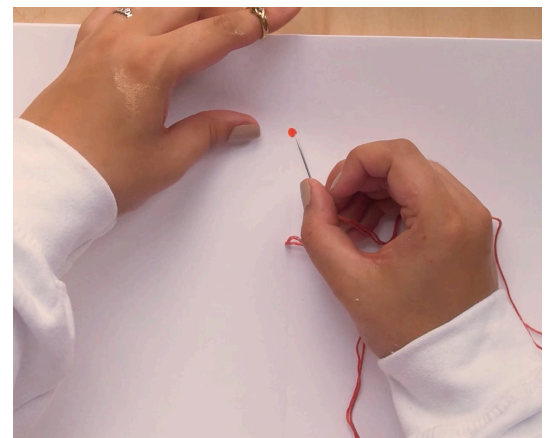

Make a hole in the middle of your zine as shown, and poke the needle through so the knot is now on the outside of your zine.

STEP 10:

Flip your zine over and make another hole halfway between your thread and the top of your zine pages.

You've made one stitch!

STEP 11:

Pull the needle and thread back through to the front side of your zine.

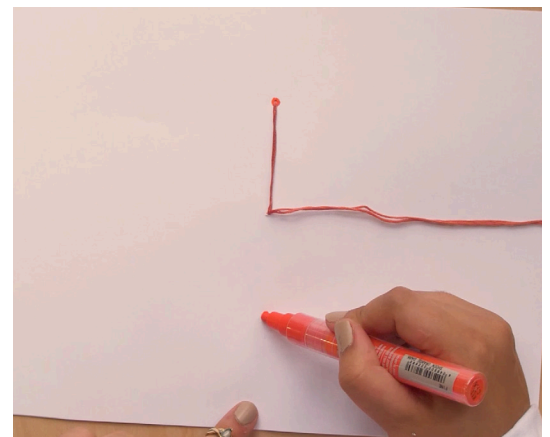

STEP 12:

Thread your needle back through the middle hole of your zine.

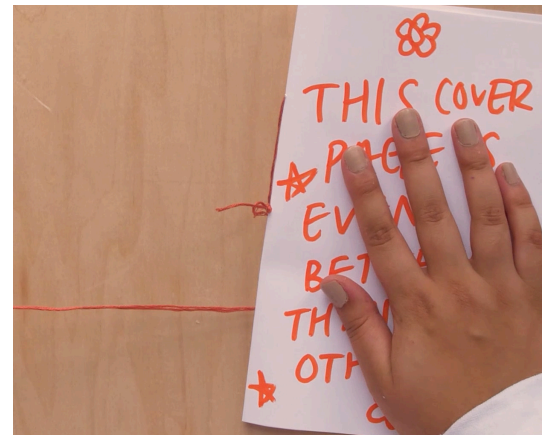

STEP 13:

Pull the needle back to the middle of your zine. You should now have one stitch on the inside of your zine, and one on the outside.

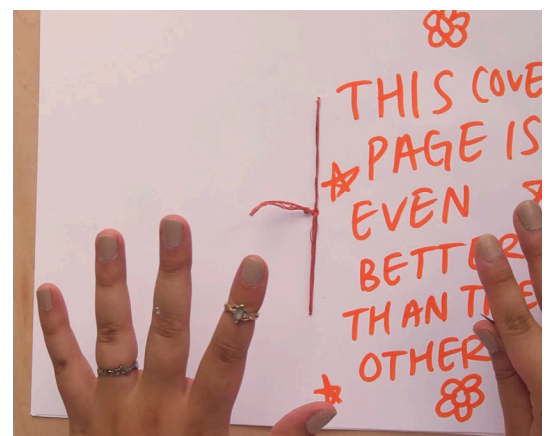

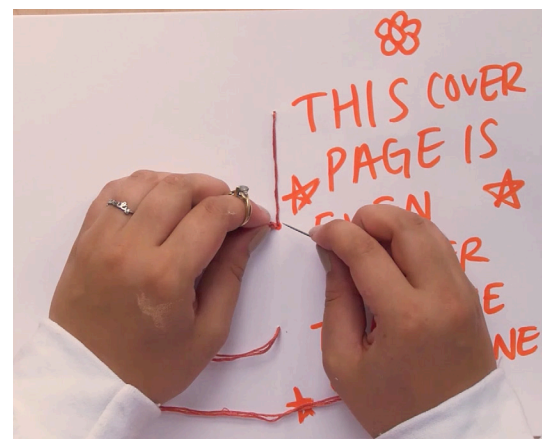

STEP 14:

Pull the needle and thread back through to the front side.

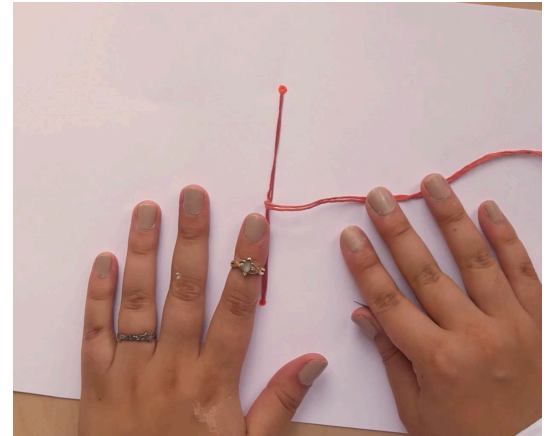

STEP 15:

Put your needle back through the middle hole again, making the last stitch for your zine.

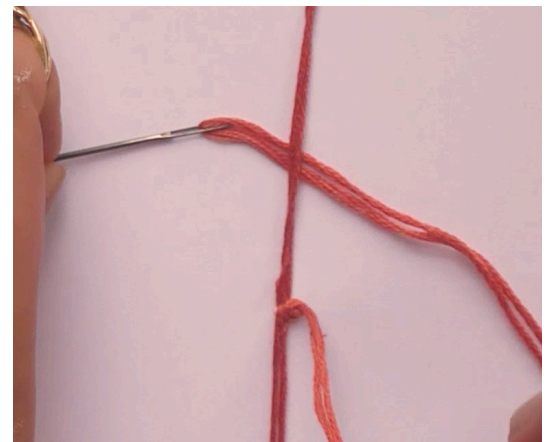

STEP 16:

On the inside of your zine, tie a few knots to end your sewing.

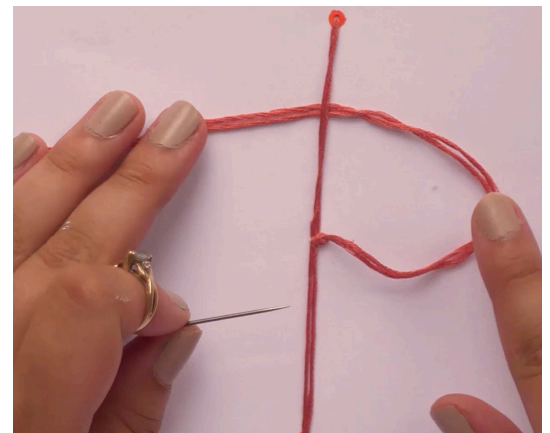

STEP 17:

You can tie a knot by threading your needle under one of your stitches.

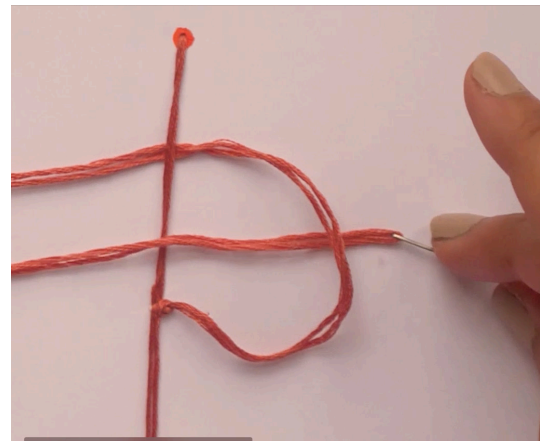

STEP 18:

Make a loop.

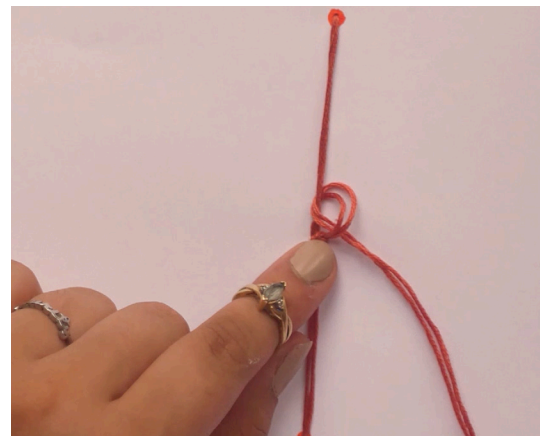

STEP 19:

Thread the needle through the loop and pull tight.

STEP 20:

Repeat. (You don't have to do this step, but it helps make a tighter knot.)

STEP 21:

Cut the extra thread, and you're done!
